Professional Profile

As a web developer and UX/UI designer, I specialise in creating applications that prioritise user experience. My goal is to ensure every digital solution is intuitive, efficient, and easy to navigate, enabling users to achieve their objectives without technological barriers.

EDUCATION

Ada ITW

Developer front end

March 2024 - March 2025

Ada ITW

UX/UI Design

July 2024 - December 2024

PINTEREST

Pinterest Advertising Essentials

February 2024 - February 2024

Universidad Tecnológica Nacional

Developer web full stack

March 2020 - August 2021

Instituto Carolina Estrada de Martínez

Journalism, Advertising and Propaganda

August 2018 - October 2024

WORK EXPERIENCE

Legion Lunari

July 2024 - December 2024

Design and management

- I created and designed visual content for social media (Instagram) targeted at a community of female gamers.
- I promoted events and activities for the group and server.

- I designed posts that strengthened engagement and maintained an attractive and consistent visual aesthetic.
- I increased the page visibility to 1,000,000 views.

PROJECTS

Developer front end **Ecommerce**

November 2024 - February 2025

Integrative Project carried out as part of the Front-End Programming Course at Ada IT WOMAN

Website development for an online store of home products

Tasks performed:

- Designed and implemented the user interface with UX/UI best practices.
- Developed and deployed the web server.
- Integrated Firebase for authentication and database management.
- Implemented user authentication and session handling.
- Managed asynchronous API requests and real-time data updates.
- Ensured website responsiveness and accessibility.
- Debugged and optimized the application for performance.

Tech stack: React.js, Vite.js, HTML, CSS, JavaScript, Firebase, UX/UI Design, Chakra UI, Framer Motion, React Hook Form, React Router DOM, Git, GitHub, Visual Studio Code

UX/UI Design **App MAEV**

July 2024 - December 2024

Integrative Project carried out as part of the UX/UI design Course at Ada IT WOMAN

Designed and developed MAEV, a conceptual AI-powered fashion assistant application. This is a complete UX/UI project that includes user research, design, and testing. While the AI is fictional, the application helps users choose outfits based on occasion, personal style, and trends, without focusing on sizes, promoting confidence and comfort in dressing.

Tasks performed:

- Conducted user research to understand the target audience's needs, preferences, and pain points.

- Developed wireframes and interactive prototypes to visualize and refine the user experience.
- Applied Design Thinking methodology to ensure the design meets user needs and business goals.
- Created high-fidelity UI designs that aligned with modern design trends and user expectations.
- Performed usability testing to validate design decisions and improve the overall user experience.
- Collaborated with developers to ensure smooth implementation of the design.
- Focused on accessibility and responsiveness across different devices and screen sizes.

Tech stack: Figma, User Research, Design Thinking, Wireframing, Prototyping, Usability Testing

Developer front end

Web Marvel Comics

August 2024 - September 2024

Developed a web application that allows users to browse comics and characters, retrieving detailed information using the Marvel API.

Tasks performed:

- Collaborated in a team to plan and develop the website.
- Implemented a responsive UI using Tailwind CSS.
- Integrated the Marvel API to fetch and display dynamic content.
- Managed asynchronous API requests and data handling.
- Developed interactive features for searching and filtering comics.
- Ensured user authentication and session management.
- Debugged and optimized performance for a seamless user experience.

Tech stack: Vite.js, HTML, Tailwind CSS, JavaScript, REST API, Git, GitHub, Visual Studio Code

Developer front end

To do list

June 2024 - July 2024

Developed a React application that allows users to create a to-do list, mark tasks as completed, delete unnecessary tasks, and manage data persistence using localStorage.

Tasks performed

- Collaborated in a team to plan and structure the application.
- Implemented task creation, completion, and deletion functionalities.
- Managed state and reactivity using React hooks.

- Integrated localStorage for data persistence.
- Developed a responsive and intuitive user interface.
- Optimized event handling and application performance.

Tech stack: React.js, JavaScript, Tailwind CSS,, LocalStorage, GitHub, Visual Code Studio

Developer front end

CSE-webpage

July 2023 - August 2023

Project requested by a client, developed in collaboration with a team.

Private project due to confidentiality, but available for technical demo upon request.

Focused on delivering a responsive and user-friendly web experience, integrating various interactive features.

Tasks performed:

- Worked as part of a team to design and develop an e-commerce/portfolio website for a client.
- Focused on creating a responsive, visually appealing front-end interface using HTML, JavaScript, Pug, and SCSS.
- Implemented interactive features such as dynamic product displays, filters, and smooth transitions.
- Collaborated with back-end developers to ensure seamless integration with the server-side functionality.
- Used Git and GitHub for version control and project management.

Tech stack: HTML, JavaScript, Pug, SCSS, Git, GitHub, Visual Studio Code.

Developer front end

Universidad Tecnológica Nacional (UTN)

January 2021 - August 2021

Developer front end and back end

Integrative Project carried out as part of the Full Stack Programming Course at UTN

Collaborated in a team to develop a web application for an online library system, where users could browse and manage books. The project involved both front-end and back-end development, focusing on user experience, real-time data updates, and database integration.

Tasks performed:

- Collaborated in a team to plan and develop both the front-end and back-end of the web application.
- Designed and implemented the user interface following UX/UI best practices.
- Developed the back-end using Node.js, managing the server and database integration.
- Integrated Firebase for user authentication and database management.
- Implemented user authentication and session handling for secure access.
- Managed asynchronous API requests and real-time data updates for book listings.
- Ensured the website was responsive, accessible, and user-friendly.
- Debugged, tested, and optimized the application for performance.
- Worked with version control using Git and GitHub to collaborate in the team.

Tech stack: Node.js, React.js, HTML, CSS, JavaScript, React Router DOM, Git, GitHub, Visual Studio Code.

SKILLS

- HTML
- CSS
- Python
- SQL
- JAVASCRIPT
- ANGULAR
- React
- UX/UI Design
- Figma
- NodeJs
- GIT
- Github
- Visual Studio Code
- Chakra UI
- Tailwind CSS
- Bootstrap
- Vue.Js
- Vite.js
- React Hook Form
- React Router DOM
- Firebase
- Framer Motion
- API REST
- JSON
- npm
- yarn

- Mobile-first
- Media Queries
- Photoshop
- Illustrator
- Behance
- Low-fi
- High-fi
- Wireframes
- User Personas
- User Research
- Usability Testing
- Heuristic Analysis
- User Flows
- Navigation Maps
- Design Thinking
- Agile Methodologies
- Sprint
- Iteration and Continuous Feedback

SOFT SKILLS

- Project Management
- Teamwork
- Time Management
- Leadership
- Critical Thinking
- Creative Thinking
